

# THE RENTERS AGENDA

The first-ever Congressional Renters Caucus was founded in 2023 by Rep. Jimmy Gomez (CA-34) to serve as a platform for legislators to collaborate, propose legislation and engage in constructive dialogue on critical issues impacting renters.

With nearly 44 million renter households in the U.S., the caucus will focus on finding policy solutions to lower costs, expand support, increase supply and remove barriers for the millions of Americans who rent.

## THE NEED FOR ACTION

For the first time in recent history, the average national rent-to-income ratio reached 30%, meaning that renters are spending a whopping 30% of their earnings on housing and the average American renter is now considered rent-burdened. The U.S. Census estimates that more than 19 million renter households meet the threshold for being classified as rent-burdened.

As the cost of home ownership continues to rise, far outpacing the increase in wages, more Americans have opted to rent. However, with a shortage of affordable housing, inadequate federal rental assistance and insufficient federal renter/fair housing protections, many Americans are forced to spend more and more just to have a place to live. While local and state governments have worked to address this growing crisis, a comprehensive, federal approach is needed.

## THE RENTERS AGENDA

The Renters Caucus is establishing the first-ever Renters Agenda in Congress—a comprehensive set of bills to protect and uplift renters—focused on these three pillars:

### LOWER COSTS:

Significantly expand the value and availability of rental assistance and public housing while reducing costs for eligible cost-burdened renters.

### INCREASE SUPPLY:

Drastically increase the supply of affordable/high quality public and private rental housing.

### REMOVE BARRIERS:

Eliminate administrative, bureaucratic, and discriminatory barriers renters face when accessing fair and affordable rental housing.
